EDUCATION

Bachelor of Technology in Computer Science and Engineering Sep 2023 - May 2027 (Expected)
Vellore Institute of Technology-AP, **CGPA: 8.76** (current)

CBSE, Class XII Apr 2022 - Mar 2023
Bhavan's Sri Ramakrishna Vidyalaya, Sainikpuri, Secunderabad, **90%**

CBSE, Class X Apr 2020 - Mar 2021
Bhavan's Sri Ramakrishna Vidyalaya, Sainikpuri, Secunderabad, **89.4%**

EXPERIENCE

Data Science Intern Feb 2024 - Mar 2024
Coratia Technologies (in association with Teachnook)

- Applied NumPy, Pandas, and Scikit-learn to preprocess and analyze structured datasets.
- Implemented exploratory data analysis and visualization pipelines using Matplotlib.
- Evaluated machine learning models using accuracy, precision-recall, and cross-validation techniques.

PROJECTS

FlavorRecipes Visit Feb 2026 - Mar 2026
JavaScript, React, Node.js, Gemini API

- Developed an AI-powered recipe generation platform that creates real-time recipes using LLM APIs.
- Integrated Gemini API for dynamic recipe generation based on user inputs.
- Designed responsive UI with optimized state handling for improved performance.

PICASO AI Visit Apr 2025 - May 2025
Python, Flask, Gemini API, JavaScript, Web Speech API

- Architected and deployed an AI chatbot integrating Gemini API for real-time conversational intelligence.
- Implemented secure API key management using environment variables for production deployment on Render.
- Designed a responsive frontend with asynchronous API communication using Fetch and REST architecture.

Convulsive Seizure Detection and Notification Device Visit Aug 2024 - Nov 2024
Arduino, Raspberry Pi, ADXL335, HC-05 Bluetooth, Embedded C, Python

- Built a wearable IoT device for real-time convulsive seizure detection.
- Integrated Raspberry Pi, Arduino, ADXL335, and HC-05 Bluetooth to build a real-time embedded seizure detection and alert system.
- Optimized motion detection algorithms to improve reliability while reducing false alarms.

ACHIEVEMENTS & POSITIONS OF RESPONSIBILITY

- Selected for the **Visteon Scholar Program**, receiving industry-focused training in automotive technologies and research.
- Co-authored an **IEEE conference paper** on *Eliminating Redundancy in EEG Seizure Models Through Precision-Aware CNN Compression* (ESIC 2026).
- Secured **1st place in 4 national-level hackathons**, including AI/ML and Generative AI competitions at IIT Hyderabad and won the **Best FinTech Solution** award at HackVerse 2025.
- Awarded **Java Code Maestro & Maverick** by CSI VIT-AP and earned **AWS Academy Graduate** certifications in Cloud Architecture and Cloud Foundations.
- Serving as **Deputy Captain, Marketing & Social Media**, IETE VIT-AP.
